

## CONTROL IN CONJUNCTION WITH NAVTECH SECURITY SYSTEM CREATES PERIMETER SECURITY AT MUSEUM OF ISLAMIC ART IN DOHA, QATAR

Today, security systems are of paramount importance as the need for more advanced technology continues to grow.

Control's DeviceMaster RTS 8-Port and 16-Ports are used in conjunction with Navtech's security systems at the Museum of Islamic Art in Doha, Qatar.

Navtech specializes in the field of millimeter wave radar. Their leading system, NS3-CT Site Security System can provide open area and perimeter security which is monitored from a control room. With the addition of the CCTV cameras, targets can be tracked and viewed without user interaction.

The NS3-CT processes data from Navtech W500 series surveillance radars, which constantly scans a full 360 degrees across the entire designated area monitoring stationary and moving target from 10m up to a range of 500m from each sensor. When the NS3-CT detects a person or vehicle, it will automatically trigger an alarm and focus a camera on the target, removing any possibility of human error.

By using the DeviceMaster RTS 8-Port and 16-Port units, Navtech can ensure that the flow of serial telemetry from their system is not interrupted at any stage and ensures CCTV cameras are reliably and precisely controlled.

# DeviceMaster® RTS 16-Port RJ45

Part Number: 99450-3

## KEY FEATURES AND BENEFITS

- No serial cable distance limitations enables communication between a host PC and serial devices located anywhere across an Ethernet network
- RS-232/422/485 software selectable
- Application compatibility supports native COM, TTY, or TCP/IP socket communication modes
- Built-in two-port 10/100 Ethernet switch simplifies network connection
- Web-based configuration makes setup and management changes quick and easy
- Real-time e-mail event notification alerts administrator of potential connection and security issues
- Wide operating temperature of -20° to 60°C
- 1U rack mount housing provides compatibility with existing IT equipment
- PortVision® DX remote monitoring and management software
- Software developer kit available for users interested in writing custom applications to run on the DeviceMaster platform
- SSL & SSH management, SSL serial data stream encryption
- RoHS2 compliant under CE
- IPV6 support

## PRODUCT DESCRIPTION

The Comtrol DeviceMaster RTS 16-Port RJ45 is a 16-port device server designed for network-enabling serial communications devices. When used with the included NSLink™ driver software and a host PC, the DeviceMaster RTS enables placement of COM or TTY ports anywhere on an Ethernet network or across

the Internet. In applications where connecting legacy serial devices to a PC without software changes is a requirement, a pair of DeviceMaster RTS units can be used to create a point-to-point serial tunnel across the network that seamlessly transfers serial data via TCP or UDP socket connections.

### Warranty Information

Comtrol offers a 30-day satisfaction guarantee and 5-year limited warranty.
