

## INDUSTRIAL BREWERY PRODUCTION & DIAGNOSTICS

A major American brewing company was in need of a solution for its production facilities that could network multiple production processes together and be able to withstand temperatures in excess of 140° F without failing. Multiple controllers and production machines needed to be seamlessly connected and it had to work flawlessly. After extensive research and testing, the company chose to deploy Control's DeviceMaster UP.

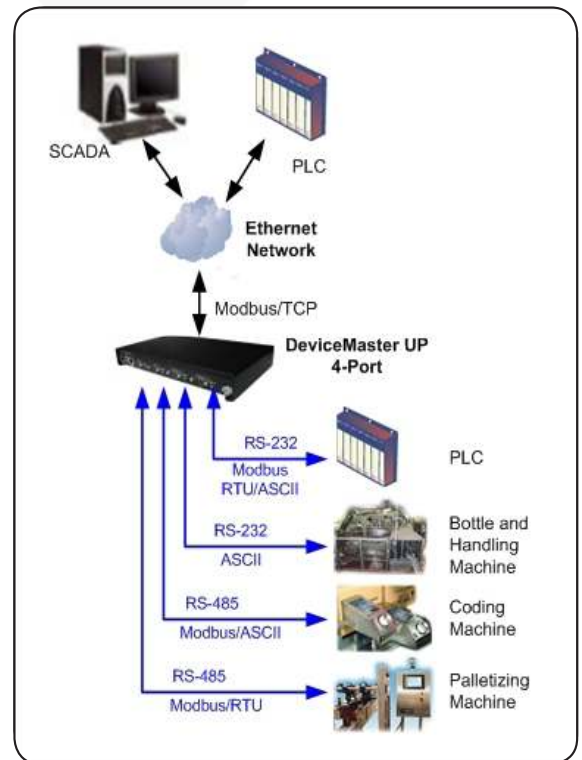

Loaded with the Modbus/TCP firmware, the DeviceMaster UP provides the brewery a flexible, easy-to-use and highly robust solution. Controllers include SCADA systems communicating over Modbus/TCP and PLCs communicating via Modbus/TCP, serial Modbus/RTU or serial Modbus/ASCII. The production machines communicate via ASCII data, Modbus/RTU or Modbus/ASCII. Further complicating the situation, the ASCII data machines need to communicate to each controller independently.

The DeviceMaster UP seamlessly networks the controllers to the production machines. The automatic Modbus protocol conversion functionality enabled multiple Modbus controllers to communicate to the serial Modbus machines. The industry-first command/response mode enabled multiple controllers to independently communicate to the ASCII production machines.

During the production process, every bottle, can, and keg is filled to the exact specifications, marked and coded with a serial number and date of manufacture, and is packaged at the palletizing and shrink wrapping machine. Each production machine's communication statistics and diagnostics are monitored through embedded web pages provided by the DeviceMaster UP, ensuring reliable factory uptime and efficiency. Control's DeviceMaster UP was able to provide superior interface, flexibility, and functionality for the brewery's production plant.

Why did the brewery choose the DeviceMaster UP?

- The DeviceMaster UP withstands operational temperatures in excess of 140° F without failure
- The DeviceMaster UP provides connectivity between a wide variety of Modbus controllers and devices
- The DeviceMaster UP provides the ability to network up to four production machines with one IP address
- Control provides unparalleled technical expertise and engineering support for its products
- Control's DeviceMaster UP provides a superior cost/benefit ratio when compared to competitive product

# DeviceMaster® UP 4-Port

Part Number: 99447-3

## KEY FEATURES AND BENEFITS

- DualConnectPlus™ Technology – simultaneously connect both serial and Ethernet devices to PLCs and/or applications. String, RFID, and barcode data filtering eliminates redundant data while extracting the RFID and barcode parameters.
- Provide PLC connectivity – to standard serial devices with protocol support for EtherNet/IP, PROFINET, Modbus/TCP, Modbus RTU/ASCII, and TCP/IP
- Supported PLC models – EtherNet/IP: Allen Bradley ControlLogix Family, SLC 5/05, PLC-5, MicroLogix. PROFINET: Siemens ET 400, 300 S7. Modbus: Modicon Quantum, Premium, Momentum, Compact, Micro, GE Fanuc Rx7i, Rx3i, 90-70, 90-30, Versamax
- Wide - 37° to 74°C industrial temperature range
- Variable power input – eliminates need for power converters
- PortVision® DX remote monitoring and management software
- Security Features – SSL & SSH management, SSL serial data stream encryption
- RoHS2 compliant under CE

---

## PRODUCT DESCRIPTION

At Control, we believe gateways should be intelligent, robust, and easy to use.

The DeviceMaster UP provides innovative EtherNet/IP, Modbus, and Profinet IO connectivity to a wide variety of devices. It can enable you to quickly connect PLCs, SCADA, OPC Servers and applications to devices such as barcode scanners, RFID readers,

weigh scales, vision systems, printers, encoders, HVAC and sensors.

With its simplified web-based configuration pages, innovative functionality and informative diagnostic information, the DeviceMaster UP provides the functionality required to make your job easier.

### Warranty Information

Control offers a 30-day satisfaction guarantee and 5-year limited warranty.
